Sanyam Singh

+91-8851887938 | sanyamsingh0205@gmail.com | LinkedIn | GitHub | India

Professional Summary

Software Development Engineer experienced in Python backend development, REST APIs, data processing, and cross-platform automation. Hands-on experience with FastAPI, SQL, MongoDB, device telemetry, log processing, and locally hosted LLM integrations. Skilled in debugging complex system issues, integrating data sources, and developing automated workflows. Focused on building reliable backend services, maintainable software, and AI-assisted information-retrieval solutions.

Education

Major Certification in Artificial Intelligence – Indian Institute of Technology Ropar *Nov 2024 – Jun 2026*

B.Tech in Information Technology – Amity University *2021 – 2025* CGPA: 8.04/10

Professional Experience

Software Development Engineer I *Jul 2025 – Present*

Teleperformance, India

- Developed Python network-monitoring scripts for Windows, Ubuntu, macOS, HP ThinPro, and Stratodesk, supporting **cross-platform diagnostics and automated data collection**.
- Consolidated monitoring scripts and integrated PowerShell implementations for Windows and Linux-based TPProtect devices, improving **consistency across supported environments**.
- Worked on backend workflows integrating device information, telemetry, logs, and identity resolution, supporting **centralized device diagnostics and investigation**.
- Contributed to locally hosted LLM and information-retrieval workflows for device data, enabling **natural-language investigation of technical information**.
- Implemented Selenium WebDriver workflows for speed-test data extraction and debugged browser execution failures, enabling **repeatable automated data collection**.
- Contributed to Chromium integration, installer development, and deployment lifecycle workflows across operating systems, addressing **browser compatibility and execution issues**.
- Investigated Linux thin-client browser failures involving display sessions and Xauthority configuration, improving **automation compatibility in Linux environments**.

Business Intern *Jan 2025 – Jul 2025*

BT Group, India

- Investigated enterprise connectivity and performance incidents involving routers, switches, and firewalls, applying root-cause analysis to support **reliable network operations**.
- Analysed connectivity symptoms and diagnostic findings to narrow down potential infrastructure issues and support **systematic incident investigation**.
- Examined network performance and troubleshooting evidence to assist with identifying corrective actions and supporting **service continuity and SLA compliance**.

Web Developer Intern *May 2024 – Aug 2024*

ReKart Innovation Pvt. Ltd., India

- Developed a MERN-based purchase-order application with vendor management and backend APIs, enabling **centralized order-processing workflows**.
- Implemented database interactions for purchase-order and vendor information, supporting **structured application data management**.
- Built PDF generation functionality for purchase orders, enabling **document export from application data**.
- Integrated frontend workflows with backend endpoints to support **end-to-end purchase-order operations**.

Selected Projects

Purchase Order Automation Tool | *Node.js, Express.js, React, MongoDB, AWS EC2*

- Built backend APIs and database workflows for vendor and purchase-order management, providing **integrated data handling and order processing**.
- Implemented role-based access control and PDF exports, supporting **controlled access and automated document generation**.

Automated Academic Publication Profiler | *Python, FastAPI, React*

- Developed data-collection workflows integrating Google Scholar and DBLP, simplifying **academic publication discovery and information retrieval**.
- Built a React interface with Excel and Word exports, enabling **structured reporting and data extraction**.

Technical Skills

Languages: Python, JavaScript, SQL, Java, C/C++
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL, ChromaDB
Data and AI: Data processing, log ingestion, Ollama, LLM integration, embeddings, vector search
Automation and Testing: Selenium WebDriver, PowerShell, debugging, implementation testing, error handling
Systems and Tools: Linux, Ubuntu, Windows, macOS, Git, GitHub, Postman, AWS EC2, Chromium

Certifications

NPTEL – Introduction to Machine Learning | Cisco CCNAv7 – Introduction to Networks; Switching, Routing and Wireless Essentials; Enterprise Networking, Security and Automation
